

The BioLytics Remediation System

Developed by Indoor Air Quality and Restoration Industry experts to place the best next generation ULTRA mold stain removal and air cleaning system available anywhere into the hands of today's mold remediation professionals.

Think Smarter - Work Different!

BIOLYTICS SYSTEM ADVANTAGES

DECREASED OVERHEAD

- . Less than 1/2 the cost of competing products!
- . Lowest priced & most effective mold stain remover period!
- . Free self-paced online and regional classroom training available!

INCREASED PROFITABILITY

- . 'Mix on Demand' stain remover additive (Use what you need when you need it!). Use less product!
- . Rapid job completion - complete more projects per week with existing work force.
- . More first-time post remediation clearance testing passes. Fewer fails & return trips.

PERFORMANCE & VERSATILITY

- . Ultra-fast VOC odor reduction after application
- . Ultra-clean virtually ANY type of non-compromised structural building materials, or color-fast fabrics, contents painted & finished surfaces, etc.
- . Amazingly versatile odor removal power: biological, fire & smoke, etc.

Made in the USA!

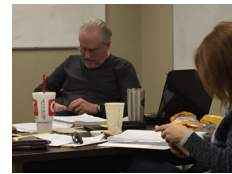

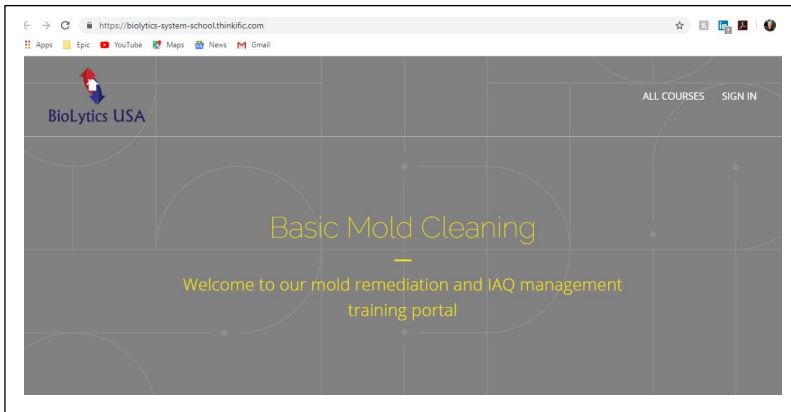

BioLytics System Mold Remediation Training

IICRC
Institute of Inspection Cleaning
and Restoration Certification

Keep your IICRC certifications current with our C.E. certified mold training courses! 7 Continuing Education Credits are awarded for successful completion of our Basic Mold Remediation Training Class!

Three Ways to Train:

1. FREE Self-Paced On-Line Training:

- Visit us at www.biolyticsusa.com and click on the Training tab then select 'Self-Paced'. This will take you to our training site and allow you to create your own private account for training at your own pace and timing.

2. FREE Live Classroom Training:

- Join us at one of our rapidly growing training classes across the US as we work with Restoration Industry based organizations and businesses to share advanced remediation systems and practices with restorers.

3. On-Site Intensive Workshops:

- Schedule a 1 – 3-day training workshop at your location. This allows for both classroom training and field work where we will perform advanced mold and IAQ remediation work on real projects that you have going and rapidly advance the skill set of your entire company!

Air/Con Air RTU Fogging Solution

Routinely achieve Ultra clean & clear post remediation clearance testing results as well as better content cleaning and odor control!

AIR/CON RTU Fogging Solutions Benefits

AFFORDABILITY

- About 1\2 the cost of competition
- Lower job costs = more profit
- Free basic applicators training

PERFORMANCE

- Stronger more concentrated formula
- Simplified application process
- Superior Clearance testing results

VERSATILITY

- Superior air quality treatment
- Cleans all types of contents
- Advanced odor removal

Superior IAQ Management with our Superior Cleaning System

NSG Solution has developed the most comprehensive, affordable and simplified cleaning system available today for professional restorers looking to streamline & grow their businesses. The BioLytics System combines next generation ULTRA cleaning technology with a more logical approach to the cleaning & remediation of given mold projects. The results are spectacular! Finished projects that are Ultra Clean & Clear, completed more quickly, with lower overhead, higher profits, & more first-time clearance testing passes!

Using Air/Con RTU fogging solution for air treatment via ULV fogging or by direct spraying for content cleaning consistently yields impressive results. Our concentrated RTU formula goes farther, penetrates deeper and removes more contaminants than any competitors like product, and at a far more reasonable price!
